About Us |

A Key Link in Completing the Arta Joojeh Sabalan

Chain Arta Joojeh Sabalan has taken an effective step towards enhancing nutritional health and hygiene standards in the country by establishing Nab Protein Mehr and launching a modern, fully automated slaughterhouse as part of its supply chain to distribution. This slaughterhouse, in collaboration with international companies Albarak, Linco, and Frigo, is equipped with the most advanced slaughtering technology in Europe.

Nab Protein Mehr utilizes advanced systems such as continuous quarantine at all stages, fully automated European robots, environmental disinfection systems, and the use of a second slaughter and aerial sorting line to offer a completely healthy and hygienic product to the market. This slaughterhouse has an RI code and is approved by the National Slaughterhouse Association. Unique features of Arta Protein products include slaughtering with purified water, complete removal of entrails, full adherence to hygiene and religious principles, sorting and packaging according to veterinary regulations and European standards. Nab Protein Mehr products maintain their health, freshness, and quality under controlled temperature conditions.

Whole Chicken |

Nutrition from the Freshest Chicken

The whole chicken from Arta Protein is prepared from healthy and fresh day-old chickens and is presented in hygienic packaging with detailed labeling after thorough cleaning and desired cutting. This product is a reliable and valuable choice for families who prioritize health and quality.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Skin, fat, inedible waste

Product Features:

- Sourced from healthy flocks under sanitary supervision.
- No water injection, preservatives, or additives.
- Natural flavor and desirable meat texture.
- Accurate labeling including weight and packaging date.
- Suitable for low-fat and high-protein diets.
- Excellent choice for sports and health meal plans.
- Processed in a hygienic environment with modern equipment.
- Offered fresh and daily from the slaughterhouse.
- Uniform and tender texture.
- Rich source of protein, vitamins, and minerals.
- Standardized weighing with high precision.

Chicken Breast |

Low-Fat Protein, Ideal for Specialized Diets

Arta Protein chicken breast is prepared from day-old chickens and is offered in hygienic packaging with complete labeling after thorough cleaning and bone separation. This lean and low-fat part of the chicken is especially popular among athletes, bodybuilders, and those seeking healthy nutrition.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Fat

Product Features:

- Sourced from healthy and fresh day-old chickens.
- Boneless and thoroughly cleaned breast.
- Low fat and high protein, suitable for sports diets.
- Prepared according to customer preferences.
- Fully hygienic packaging with accurate date and weight.
- Suitable for making kebabs, dishes, steaks, and diet cooking.
- Tender texture and quick cooking.
- No preservatives.
- Versatile flavor, high absorption for various spices
- Odorless and color-stable, indicating true freshness.
- Processed under strict sanitary supervision.

Chicken Fillet |

Tender, Quick Cooking, Less Fat

Arta Protein chicken fillet is a tender meat strip without waste, sourced from the underside of the day-old chicken breast. This part is an ideal choice for diet meals, light dishes, marinating, and grilling due to its soft texture, uniform volume, and short cooking time.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: None

Product Features:

- sourced from the boneless, fat-free, and thoroughly cleaned
- fillet from the underside of the chicken breast.
- Suitable for quick and light cooking.
- Tender and easy to cook.
- without waste; all weight is consumable.
- Fully hygienic and labeled packaging.
- Natural flavor with high absorption for seasoning.
- Precise preparation according to customer requests.
- More flavorful than breast due to higher fat and tenderness.
- Processed with modern equipment
- Accurate and standard weight with safe packaging.

Chicken Drumsticks |

Delicious, Rich in Iron and Flavor

Arta Protein chicken drumsticks are prepared from freshly slaughtered chickens. This part of the chicken, with its delicious taste, drumsticks texture, and natural content of iron and zinc, is an excellent choice for preparing various dishes.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Skin and fat

Product Features:

- Rich in iron, zinc, and myoglobin.
- Balanced fat content.
- With a deeper flavor.
- Cleaned and ready for consumption.
- Softer and fattier texture compared to breast.
- Suitable for stews, grilling, and traditional Iranian dishes.
- Rich flavor and food thickening properties.
- Hygienic packaging with accurate weight and date labeling.
- Processed under sanitary conditions with quality control.
- A popular choice for restaurants and catering services.
- High nutritional value and a great source of energy.

Frozen Chicken |

Fresh and Frozen

Arta Protein frozen chicken is made from healthy and freshly slaughtered chickens, which are immediately frozen under standard conditions after cleaning to preserve their nutritional value and quality. This product is a suitable choice for home cooking, freezer storage, and preparing healthy meals at various times.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Skin, fat, inedible waste

Product Features:

- Frozen immediately after slaughter and cleaning.
- Maintains texture and nutritional value with standard freezing.
- Suitable for long-term storage
- Complete specification labeling.
- Hygienic packaging.
- freezer-resistant packaging.
- Rich in protein with less fat compared to red meat.
- Natural protein with high biological value and easy absorption.
- Natural flavor, odorless, and free from additives.
- Available for order in various volumes
- Prepared, packaged, and shipped while fully maintaining the cold chain.

Chicken Wings |

Crispy, Tasty, Ideal for Flavor and Energy

Arta Protein chicken wings are prepared from freshly slaughtered chickens and are an excellent choice for cooking, tasty snacks, or kebabs due to their balanced fat content, high nutritional value, and marinating capability. This part is the crispiest part of the chicken.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Single wing

Product Features:

- Tender and crispy texture, suitable for frying and grilling.
- Source of protein.
- Source of iron.
- Source of phosphorus and magnesium.
- Suitable for making kebabs, fried wings, and dishes.
- Hygienic packaging without additives.
- High absorption capability for marinating
- Natural color, without unpleasant odors.
- Produced under complete sanitary and quality supervision.
- Maintains quality and flavor after cooking.
- An economical, tasty, and popular product.

Chicken Thighs |

Fatty, Tender, Energetic, and Delicious

Arta Protein chicken shoulders are prepared from freshly slaughtered chickens and are a popular choice for kebabs, stews, and home-cooked meals due to their balanced fat content, tender texture, and delightful flavor. This part is especially useful for high-calorie meals or protein-rich diets.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: Fat

Product Features:

- Sourced from the fresh and meaty part of the chicken shoulder.
- Fattier than other parts, with a more delicious flavor.
- Rich in protein and beneficial amino acids.
- Contains vitamins A, B, and D.
- High collagen content, beneficial for skin and joint health.
- Hygienic packaging with weight and date labeling.
- Source of phosphorus, potassium, sodium, and other minerals.
- Easy to season with spices and marinate.
- Quick and even cooking at high temperatures.
- High nutritional value relative to its size.
- Processed under strict sanitary and quality standards.

Chicken Liver |

Rich in Iron, Beneficial for Blood Formation and Body Strength

Arta Protein chicken liver is sourced from fresh and healthy chickens and is an excellent choice for blood health, immune system support, and overall body performance due to its iron, vitamin A, and B12 content. This cleaned product is ready for consumption and can be used in healthy and diverse diets.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: None

Product Features:

- No waste, completely cleaned and ready for consumption.
- Rich in iron, vitamins A and B12.
- Blood-boosting and suitable for anemia.

- Processed under complete hygiene and proper packaging.
- No chemical additives, natural and organic.
- Provides necessary calcium, phosphorus and...

Industrial Frozen Breeder Chicken |

Economical, Suitable for Industrial Use and Processing

Arta Protein's frozen parent chicken is sourced from older laying hens that have been removed from the breeding cycle after the end of their production period. This type of meat, due to its firmer texture, lower fat content, and stronger flavor, is a suitable option for industrial processing, feed, extraction, and...

- Prepared from Parent chicken from Arta Protein
- By-products: Skin, fat, inedible waste

Product Features:

- Produced from end-of-cycle parent chickens.
- Larger size and higher final weight compared to broiler chickens.
- Suitable for making extracts usable in meat processing.
- Hygienic packaging with weight and slaughter date labeling.
- Long-term storage capability under freezing conditions.
- Competitive price relative to volume.
- Feather-free meat, with precise waste separation.
- Processed while maintaining the cold chain
- Available for bulk orders for industrial units.
- Suitable for producing sausages and cold cuts.
- Suitable for meat products.

Chicken Feathers |

Light, Natural, Usable in Various Industries

Arta Protein chicken feathers are collected from freshly slaughtered chickens and, after initial cleaning, are used as raw material in various industries. This product is light, natural, and free from waste, making it an ideal choice for industrial, sanitary, and diverse product manufacturing due to its unique fibrous structure.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: None

Product Features:

- Produced from healthy, freshly slaughtered chickens.
- Free from contamination, fat, or excess waste.
- Lightweight and compressible, suitable for transport and storage.
- High disinfectability for medical and sanitary uses.
- Recyclable and combinable with other fibrous materials.
- No additional moisture, suitable for long-term storage.
- Extracted using sanitary and controlled methods.
- Available for bulk orders.
- Resistant to mold and decay under proper storage conditions.
- Prepared according to hygiene principles and quality standards.
- Available in various volumes depending on customer needs.

Meat Meal |

Tasty, Suitable for Livestock, Poultry, and Aquaculture

Arta Protein meat powder is produced using thermal and hygienic processes, including drying, sterilization, and milling. This slaughterhouse, equipped with advanced European machinery for processing and cooking waste, is capable of producing meat powder of the highest quality and has the potential to export meat powder to regional countries.

- Prepared from Freshly Slaughtered Chicken by Arta Protein
- By-products: None

Product Features:

- Processed from non-edible protein tissues
- Free from feathers, hair, nails, or unground bones.
- Dried and milled using sterilizing thermal technology.
- High protein content (50-55%).
- Suitable for the rapid growth of livestock and poultry.
- Low moisture content (about 5%) for extended shelf life.
- Enhances the immune system and physical performance of animals.
- Palatable and quickly absorbed nutrients in the animal's body.
- An excellent option for mixing with daily feed for livestock and...
- Suitable for reducing protein supply costs.
- Offered in durable and hygienic packaging.
